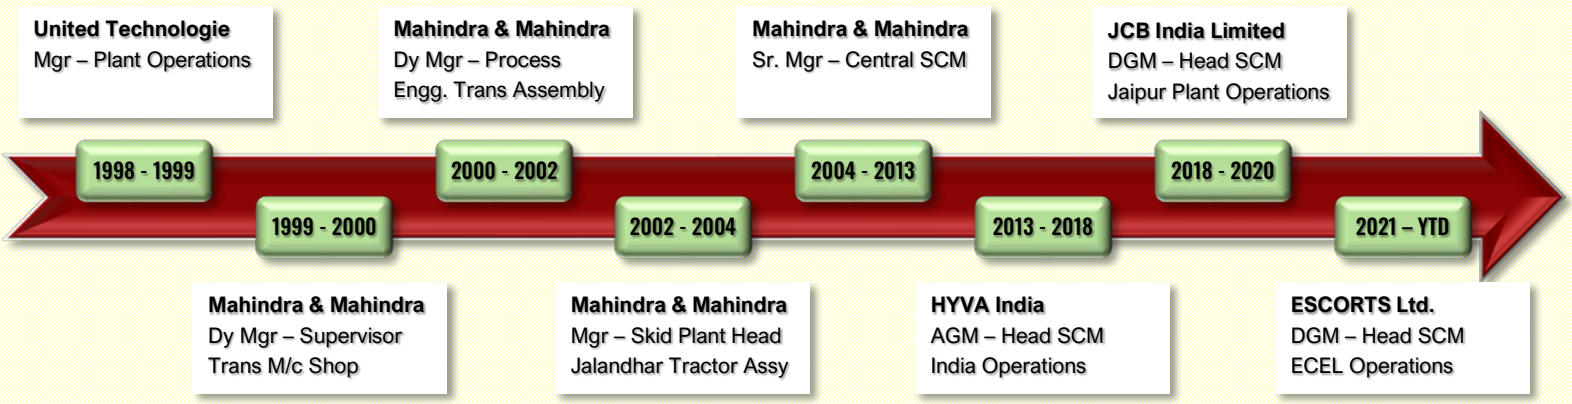
- ✓ Implementation of TOC-based Dynamic Buffer Management System yielded Inventory reduction of –
  - 3 days (from 12 days to 9 days) in Mahindra & Mahindra.
  - $ 2.1 Million in HYVA India
  - ₹ 44 Cr (from ₹ 116 Cr. to 72 Cr.) & 11 days (from 18 days to 7 days)
- ✓ Implemented initiatives like Consolidation, Milk Run, DPD, Freight Optimisation, Reverse Logistics & Route Optimization in HYVA to yield Annual Savings of $ 2.42 Million & ₹ 1.14 Cr. in JCB.
- ✓ Implemented Low Cost, Excel-based SPARES Management System, resulting in 56% Growth in 2013.

Career Timeline:



Work Experience:

ESCORTS Limited | Head Supply Chain Management | ECEL Operations | October 2021 – Till Date

Lead the End to End SCM Team of 5 Direct (DGM & Sr. Managers) Reportees spanning the entire gambit of Planning, S&Op, Material Management, Procurement, Logistic Services, Warehouse Management, Spares Management & Supplier Management.

Current Challenges are undertaken –

- ✓ Develop Lead indicators matrices to ensure the KPIs are met as per management expectations.
- ✓ Design & Implement Policies and Guidelines to ensure Systems & Compliances are adhered to.
- ✓ Inventory – High Aging & Imbalanced due to Industry fluctuations on account of Covid & Panic scheduling.
- ✓ Improving SCM Flexibility to meet Customer requirements in the Current changing Market.
- ✓ Improving SCM of Supplier's Supplier, to enable early alarm system for any adversities in mid-term future.

JCB India Limited | Head Supply Chain Management | Jaipur Operations | August 2018 – May 2020

Heading End-to-End Supply Chain responsibilities with an Annual Budgeted Spend of approx. `2,000 Cr. Manage the P&L of the Plant Supply Chain Operation.

Supervised 8 Direct Reportees (AGM & Managers) with direct responsibility for the following functional areas: Client Relationship | Order fulfilment | Commodity Storage (Warehouse Management) | Logistic Services | Supplier Management | Quality Assurance | S&OP | Production Planning | Analytics | Optimisation.

Provide leadership, oversight & guidance to large Global Supply Management & Technical Team to achieve results established.

Serve as a member of Senior Leadership Team, which sets project strategy & regularly identifies & plans an intervention to address key technical challenges.

Driving Business relationships with internal business partners, external vendors & key contract partners, ensuring all partners/vendors are delivering services/products as per commitments. Liaising & coordinating with stakeholders at regional & global levels for securing relevant buy-ins, strategic decisions making & seamless day-to-day operations.

Support product line managers by providing a vision to create & maintain an innovative global sourcing & procurement strategy.

Develop Supply Chain standards, policies & work processes in line with company standards, drive execution & continuous improvements. Optimize teams, systems & processes to optimise Raw Material, WIP & FG.

Provide Leadership, Co-ordinate, manage & evaluate plant Supply chain personnel. Directly oversee the Supply management team, including recruiting & performance management.

Engage with Suppliers to establish &/or improve processes & performance management.

Execute the implementation & operational plan for all the point-of-use systems.

Key Business Highlights –

- ✓ Achieved inventory reduction from ₹ 116 Cr. to ₹ 72 Cr. Implied 18 days to 7 days Cycle.
- ✓ Optimised the Stock Norms of Local Stock from FIVE days to ONE day & Import Stock from 45 days to 15 days.
- ✓ Reduced Slow Moving Inventory by ₹ 7 Cr – 36%.
- ✓ Strategized incorporation of 7 Models, 51 variants, 350+ SKUs & 11,500+ Components under existing infrastructure, thus realising the savings of ₹ 45 Cr. in CAPEX & ₹ 87 lacs per month in OPEX.
- ✓ Controlled & Optimized the Premium Freight, realizing savings of ₹ 1.14 Cr.
- ✓ Implemented Alternate Sourcing / Localising Initiatives to improve GPM by 2.13%.
- ✓ Applied TOC Concepts, by implementing DBM (Dynamic Buffer Management) for scheduling raw material based on the Norm/Consumption-based Replenishment Model. Guarding against Forecast fluctuations/errors.
- ✓ Reduction of 21% carbon footprint by optimising the use of wood & plastic in Supply Chain & Logistics Operation.

HYVA India | Head Supply Chain Management | INDIA Operations | June 2013 – July 2018

Scaled up the operations spanning 4 Plants – Mumbai, Pune, Bangalore & Jamshedpur in terms of Supply Chain performance & productivity which included S&Op, Production Planning, Procurement & Logistics. Led & managed a geographically dispersed team of 127 resources with an annual purchase budget of ₹ 350 to ₹ 400 Cr.

- ✓ Addressed challenges such as high-inventory occupying nearly half of the premise space. Identified the import contents & consolidated the same concerning logistics:

- Implemented DBM & increased frequency of dispatch from monthly to weekly. Improved availability & operating costs, productivity in stores & dispatch department, logistics costs, waste elimination, & more.

- ✓ Realigned the Procurement & Planning Team's focus on stock norms. Improved statistical processes for effective demand planning, and estimations & implemented a parts management system for real-time replenishment of orders.
  - Achieved 56% growth within a span of ONE year & inventory reduction of $ 2.1 Million
- ✓ Reduced the overall freight cost by 27% through consolidation, reverse logistics, & route optimization for domestic & consolidation of the LCL shipments, DPD, & Inco-Term revisions for import costs.
  - Achieved savings of $ 2.25 Million in terms of import freight cost.
- ✓ Implemented milk run for local suppliers along with packaging alterations leading to cost savings of $ 0.35 Million.

Mahindra & Mahindra (FES) | Sr. Manager SCPC | INDIA Operations | April 2004 – May 2013

Progressed across roles & functions such as Production Supervisor, Process Engineer, Logistics, Assembly Quality, Excise & Taxation & Led the Central Planning Team at the Head Office with aim of leveraging the SCM strategies for the Farm Division.

- ✓ In charge of replenishment of 250+ variants of FGs (Tractors) with a team of 24 across the domestic sector & exports to US, Australia, Europe, Africa, & Asian markets via 5 manufacturing plants in India.
- ✓ Adopted the SCM module of SAP for defining the plant level model-wise product requirement in line with the organization's multi-plant production & distribution network spread Pan India.
- ✓ Designed & Developed Pull based replenishment of Finished goods – All India Area Stockyards through FIVE plants – based on seasonality primarily lean & peak fluctuations.
  - Optimized Demand Planning & Supply Network, savings by nearly ₹ 52 Million.
- ✓ Enable Demand planning using statistical methods of Forecasting & replenishment thru DBM.
  - Inventory reduced to 9 days from 12 days.

Previous Experiences –

✓ Mahindra & Mahindra (FES)	| Skid Plant Head – Punjab	| Jalandhar	| Jul 2002 – Mar 2002
✓ Mahindra & Mahindra (FES)	| Dy. Manager – Process Engineer	| Mumbai	| Nov 2000 – Jun 2002
✓ Mahindra & Mahindra (FES)	| Dy. Manager – Shift Engineer	| Mumbai	| Aug 1999 – Oct 2000
